PROJECTS

StudyNotion App Project

Developed a full-stack web application using the MERN (MongoDB, Express.js, React.js, Node.js) stack integrated with Notion API. Implemented CRUD functionalities, user authentication, and real-time data updates. Utilized modern web development practices to create a responsive and intuitive user interface. Demonstrated proficiency in backend and frontend development, API integration, and agile project management.

Frontend :- HTML, CSS, Tailwind, Javascript, React.js, Redux.js

Backend:- Node.js, Express.js, MongoDB

Real Time Chat App Project

Developed a real-time chat application using the MERN stack along with Socket.IO for bi-directional communication. Implemented features such as user authentication, private messaging, and real-time updates. Leveraged Socket.IO to enable seamless and instant communication between users. Demonstrated proficiency in full-stack development, real-time web technologies, and collaborative application design.

Frontend :- HTML, CSS, Tailwind, Javascript, React.js, Redux.js

Backend:- Node.js, Express.js, MongoDB

WORK EXPERIENCE

CODSOFT- 1 Month Internship

5 Jan – 4 Feb

Gained hands-on experience in software development methodologies during a one-month internship at CodSoft. Contributed to various projects, collaborating with experienced developers to enhance skills in coding, debugging, and problem-solving. Acquired practical insights into the software development lifecycle and refined understanding of industry-standard tools and practices

TECHNICAL SKILLS

Language :- Javascript, Typescript, C++

Web Development :- React.js, Node.js, Express.js, MongoDB, HTML, CSS, Tailwind

Other:- Data Structure and Algorithm
